## AVANT-GARDE SURFACES

PANESPOL's TRENDS line represents a new concept in surface decoration. Designed specifically for professional décor, it grants a contemporary and avant-garde style to any area.

## SUGGESTING TRENDS

The TRENDS line does not impose colours, it suggests trends. Our vast selection of colours is divided into 3 major groups: flat, combined and metal colours. The material is manufactured in a colour range spanning from black to white which includes the whole colour palette, with your imagination as the limit. Any TRENDS model can be manufactured and customised choosing colours that adapt to the corporate identity of the space being decorated.

## QUICK AND EASY FITTING

The main innovation in the TRENDS line is the self-adhesive rear surface, which improves fitting and cuts down installation time. TRENDS comes in panels of about one square metre, which makes it easy to estimate the number of panels required.
